Mr. Richard Skaggs, President  
Omstar, Inc.  
4520 Palos Verdes Drive East  
Rancho Palos Verdes, CA 90274

Dear Mr. Skaggs:

I am writing to express my sincere delight to learn of the potential significant public policy impact that your new Omstar fuel and oil conditioners may have on cleaning up the environment and in general fuel economy in demonstrated legitimate tests.

You should be loudly applauded in assisting in the development of this innovative technology and in sharing its applicable usage to public decision-makers at all tiers of government.

With another looming OPEC action that keeps us fuel-dependent on foreign reserves; and with recent EPA action to halt mobility and growth in Southern California due to non-conforming emission and pollution results; any product that moves us closer to better fuel economy, a cleaner engine and a better environment should be fully explored, tested and if warranted, full integrated as soon as possible.

I look forward in working with you on this apparent important break through in the future.

Sincerely,

H. Eric Schockman, Ph. D.  
Director
