Richard Skaggs  
President  
Omstar Productions  
1714 N. Ivar Street  
Hollywood, California 90028

Dear Mr. Skaggs:

I would like to congratulate Omstar Productions for making the timely film, "The Sky Is Falling."

Your movie dramatically documents that acid rain is one of the most pressing, environmental problems facing the nation. In "The Sky Is Falling"; the phenomenon of acid rain is easily understood and constructive solutions are objectively presented. I know that this film will prove invaluable as a means for informing the public and motivating decision makers to solve this problem.

Again, let me extend my commendations for an excellent piece of work.

With every good wish, I am,

Sincerely;

HENRY A. WAXMAN

Chairman, Subcommittee on  
Health and the Environment
